IN THE CLAIMS

Please amend the claims as follows.

14.   (Amended)   An apparatus for remotely monitoring a picture archiving and communication system comprising:

a remote first terminal in communication with a web-based server via a network connection, said remote first terminal comprising a remote signal;

a plurality of picture archiving and communication system workstations connected to said web-based server; and

said web-based server comprising a data retriever for retrieving data from at least one of said plurality of picture archiving and communication system workstations responsive to said remote signal, said web-based server allowing remote correction of an error at at least one of said plurality of picture archiving and communication system workstations.

17.   (Amended)   A method for remotely monitoring a picture archiving and communication system, said method comprising:

connecting to a web-based server on a network;

instructing the web-based server to extract log data from at least one of a plurality of picture archiving and communication system workstations in communication with the web-based server;

transmitting the log data to a remote terminal for error analysis; and

remotely correcting an error.
